

weather

the range of peak temperature hour range is from 11am to 1pm this is due to the sun is hitting directly the country because the philippines is sitting directly to equator baguio peak temperature is not surprising because of its elavation

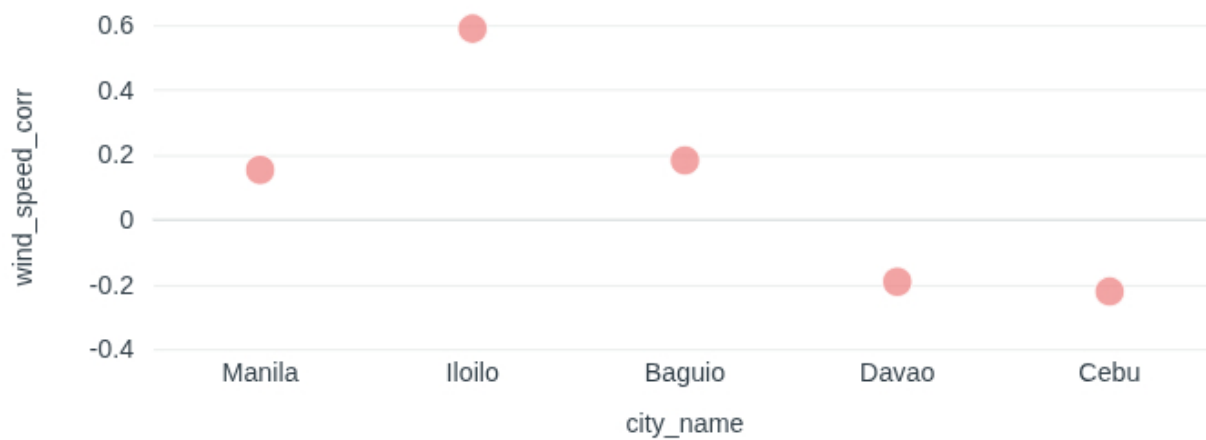

peak temperature per city based on time

temperature on different cities

Wind speed correlation to rain for each city

this shows the behavior of windspead if its raining on different cities

iloilo windspead scoring highest in correlation from rain we can actually verify this based on the windspeed column where the values are jumping around when its raining its not surprising since iloilo is sitting on the coast and unlike cebu who is surounded by bigger ilands even though its also place in the coast

cities ranking summary

#	city_name	average_windspeed	maximum_windspeed	average_precipitation
1	Iloilo	11.72	27.3	0.054
2	Manila	10.65	29.3	0.047
3	Cebu	7.99	23.4	0.032
4	Baguio	5.92	13.2	0.096
5	Davao	4.2	13.5	0.04
